

Are you one of those kids who thinks that Math is boring? Math is difficult? A Math class has to be endured? Simple addition is a task? Multiplications are complicated? Algebra worries you? Geometry makes you wonder about all those angles? Trigonometry makes your head spin? . Do you get nervous before a Math test? Do you sometimes think that life would be so much simpler if you didn't have to learn Math? That you would rather go fishing or hiking or something more exiting and fun than do your Math homework?

If you have said "Yes" to some of those questions, is it any consolation if we tell you that there are millions of kids...yes, millions of kids around the world who think just like you? Feel exactly the way you do?

Having acknowledged this, would you like to change your perception...your thinking...your attitude...inhibitions towards Math?
